Water for Life

Bio- Sand Filters

THE CHECKLIST

- BioSand Filters remove 95.0 to 99.0% of organic contaminants, including bacteria, viruses, protozoa, worms, and particles
- "No other single process can effect such an improvement in the physical, chemical and bacteriological quality of surface waters."
- Work carried out during 6 months in 2007 in rural Kenyan households by Tiwari *et al* (2009, [ref_02]) found that households using biosand filters had a 54% reduction in child diarrhoea days compared to control households.
- Jesus was concerned about the whole person. He healed the sick as he preached and taught. We too must share his concern. When Jesus sent out his twelve disciples to minister to others, he commanded them to heal the sick and to be concerned for the physical needs of others as they preached the good news of Jesus Christ.

YOU CAN HELP.

YOUR FAMILY, CHURCH, SUNDAY SCHOOL, WORK-MATES, AWANA'S, SCOUT GROUP, CLASS MATES, ETC. CAN NOW SPONSOR A FILTER FOR A FAMILY.

A donation of \$65 will purchase materials/labor for building, installation, training and follow up for the filter and trouble-shooting.

Become a part of a family's well being in the rural area of Zambia's Southern Province.
